PERSON PROFILE

Enthusiastic technical professional with a complete understanding of the entire software development life-cycle. Known for having talents in PHP and SQL and also a big fan of microservices architecture and object-oriented programming paradigm.

Having good skills in communication and presentations. Experienced in the full project life cycle from design to implementation to integration.

Also experienced with the agile development methodology.

EMPLOYMENT HISTORY

Full Stack Software Developer at Softia, Bucharest

March 2020 — Present

- Rewrite JQuery pages to VueJS.
- Added Vuex state management system for the frontend app.
- Created PostgreSQL functions that retrieved big chunks of data.
- Improve docker images
- Fixed system tests.
- Created Vue components from scratch.

Technologies used:

- PHP 7.3, Laravel, VueJS 2.4, JQuery, PostgreSQL, Docker.

Full Stack Software Developer at Frisbo, Brasov

February 2019 — October 2019

- Integrated several different warehouse management systems

API.

- Performed troubleshooting of technical issues within

the production environment.

- Wrote server-side and client-side code using PHP,

HTML, CSS, and JavaScript, specifically with Angular 7 framework on the frontend and lumen on the backend.

- Mentored junior developers to coach on industry

best practices and techniques, resulting in

competent developers and greater product quality.

- The application was written having a "microservices

architecture" in mind so I've learned docker as a result

Technologies used:

- PHP 7.3, Lumen, Angular, MySQL, Docker, RabbitMQ.

PHP Software Developer at EMAG, Bucharest

April 2018 — January 2019

- Worked on an internal app called DMS which is short for

Delivery Management System.

- Written unit tests
- Integrated and maintained several different couriers

API such as Fan Courier, Sameday, etc

- Worked with RabbitMQ message broker
- Create and optimize MySQL queries for a better app performance
- Helped develop an android application written in Java.

Technologies used:

- PHP, Symfony, JQuery, PostgreSQL, Java, RabbitMQ.

Full Stack Software Developer at Ubisoft, Bucharest

July 2017 — April 2018

• Analyzed requirements and designed, developed and implemented software applications for multiple teams in the QC (Quality Control) department.

• Maintained and develop frontend applications with VueJS

Technologies used:

- PHP, Laravel, MySQL, CSS.

PHP Developer at Stargift, Bucharest

February 2017 — July 2017

• Develop new functionality for the e-commerce website called www.stargift.ro

• Helped with developing and maintaining a product image preview system.

The product preview system's responsibilities were to take the user photos and generate a new photo where the user photos were displayed as it was printed on the products.

Technologies used:

- PHP, MySQL, CSS, JavaScript and HTML 5

PHP Developer at BluePink Software, Constanta

July 2016 — December 2020

• Worked on multiple web applications written in a custom PHP Framework

• I've written MySQL queries for insert, update, delete resources from database

• Created pagination functionality.

Technologies used:

- PHP, MySQL, CSS, JavaScript and HTML 5

EDUCATION

Bachelor degree in computer science, Ovidius university, Constanta

October 2013 — October 2016
